

# Palm Dashboard (Updated January 2025)

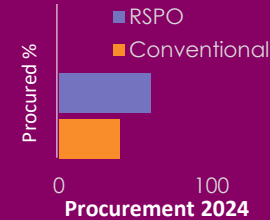

## Specialty Fats

Our specialty fats business has been a member of RSPO since 2006 and supply chain certified since 2011. 100% of its palm oil is physically RSPO certified with the vast majority of procurement coming from Identity Preserved mills, ensuring the highest global environmental and social standards are met.

## Palm Oil Supply Chains

## Dairy

Our dairy operation in Malaysia uses palm oil in the manufacture of fat-filled milk powder. As well as supplying clean, hygienic, wholesome and fully-traceable milk, we are switching to RSPO certified palm oil in the production of these milk powders and aim to achieve 100% certified palm oil by 2025.
